

Alexandre LAM

Frontend Developer

EXPERIENCE

Freelance Frontend Developer

Okarito 

May 2021 - Present - 7 months, Paris 12e

Directly collaborate with Product team and agile developers to prototype, design and deliver Okarito app using NuxtJs. Develop the app following best practices, doing code review, writing docs, Storybook, Swagger and continuously improving and deploying it using Github Actions.

Study and writing of software requirements specifications

RATP 

May 2020 - July 2020 - 3 months, Fontenay-sous-Bois

Analyzed the RATP environment and network operation. Collected needs from different actors. Created mockups using Figma. Developed the functional specifications of the future RATP crisis management software.

PROJECTS

Event Management app for Co-operative Store

Les Grains de Sel 

September 2019 - January 2020 - 5 months, Paris 13e

Developed an event management app for a co-operative store using Django and Vuejs.

Fullstack Development

Machine Learning Labelling

April 2020 - June 2020 - 3 months

Developed a fullstack app that allows you to label images for the training of a machine learning for computer vision algorithms. Built a RESTful API using Python and Django. Developed frontend using React and AntD.

EDUCATION

Computer Science Major

Institut Mines-Télécom, Nord Europe 

2018 - 2023, Lille - Douai
